Outcomes

178,000 people
across 128
countries

74 in person
events across
50+ sites

11,500 projects
submitted

Every individual
that participated
learned more about
the value and use
of AI in daily
activities

Winners for every
track and one
overall winner

Learnings

- Network/Infrastructure hosting
- Load testing
- Updated documentation
- Increased cross unit collaboration
- More understanding

Winners

AskIBM

- 1. AskSRE
- 2. Help with manufacturing operations
- 3. Assist with security questions for designing and implementing hybrid cloud solutions

Consulting Advantage

- 1. Improve project delivery
- 2. Automate blog creation for new market areas
- 3. Automate business process creation in Salesforce

watsonx code Assistant

- 1. Documenting large code base
- 2. Creating python automation for Z
- 3. Improving on premise deployment

InstructLab

- 1. Sensitive data identification
- 2. Assist with understanding of cloud optimizations for resources
- 3. Planning analytics understanding

watsonx.ai

- 1. Meeting follow up activities
- 2. Gathering data required for a security incident
- 3. Cleanse and summarize data to provide Q&A on data

watsonx.ai & watsonx.data

- 1. Generating SOWs
- 2. Business Partner Product Q&A
- 3. Product data Q&A

watsonx Orchestrate

- 1. Automation for client interest request
- 2. Improving SOX compliance around data updates
- 3. Purchase order automation
